

Project Management

HSEQ Management

Our performance depends on our ability to continually improve the quality of the services we provide to our clients, while protecting people and minimising any negative impacts on the environment.

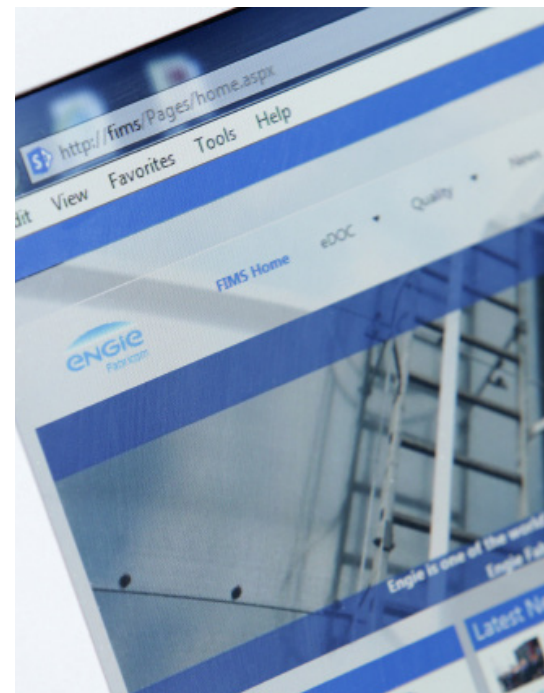

To enable the organisation to achieve the highest levels of performance we have fully embedded Management Systems.

These systems comply with the relevant international standards and are subject to external verifications:

- ISO 9001 : 2008
- ISO 14001 : 2015
- ISO 45001 : 2018

As part of our continuous improvement programme we are a member of the following organisations:

- Engineering Construction Industry Training Board
- Engineering Construction Industry Board
- Tees Valley Engineering Partnership
- Humber Chemical Focus
- North East SHE Partnership
- Energy Industries Council
- RoSPA

Our aim is to be our clients' Partner of Choice

We are committed to these guiding principles:

- We believe that all accidents are preventable - aim for zero
- Every employee and visitor shall leave at the end of the day in the same condition as when they came
- That nothing is so urgent that we cannot take the time to ensure it is carried out safely

How we do this?

- Implementation of certified ISO 45001 Safety Management System
- Active participation at all levels - empowering everyone in the organisation to achieve the highest level of safety performance

- To create and maintain a safe working environment for all our employees and our customers
- Positive recognition scheme for HSE performance
- Adopt environmentally friendly standard practices that consider the environment
- Identification, evaluation and management of significant environmental aspects
- Establishing and monitoring KPI's for quality, health and safety and environmental performance.

We have also been awarded the RoSPA Order of Distinction for maintaining an excellent safety record for twenty two consecutive years.
