

# Consultancy and Resource Supply

Our renewables team can offer our clients a suite of consultancy and resource services.

We can support our client's requirements ranging from:

- Engineering and project support
- Supply technicians and support staff
- Vessel charter
- Procurement and storage facilities

## Engineering and Project Support

Our engineers have an extensive track record in providing a range of innovate designs and engineering solutions using the latest CAD systems.

Our project teams assist client's in providing planning, cost and risk management support.

## Technician Supply

We have a comprehensive database of trained technicians to assist clients resource requirements.

In addition to our renewables database we have our own internal recruitment agency, (Resource Direct Recruitment) who can supply a range of resource services including management of resource campaigns, market intelligence and payrolling.

## Vessel Charter

We can provide managed vessel charter on behalf of our clients.

## Procurement and Storage Facilities

We have a comprehensive, approved supply chain which we utilise to ensure we can efficiently and effectively manage client's procurement activities.

In addition to procurement we have approx. 4,000 sq. ft. of dedicated renewables storage facilities.

Our aim is to be our clients' Partner of Choice
